OBJECTIVE

Looking for a full-time position within the Geospatial industry.

PERSONAL STATEMENT

Highly analytical graduate with an interest in both technology and travel. A mix of the two led to a desire to pursue Geographic Information Systems (GIS).

TECHNICAL SKILLS

- Manipulating data using Python
 - Knowledge of ESRI enterprise GIS
 - Web design
 - Field Data collection using ArcGIS Field Maps
 - Creating forms using Survey123 Connect
 - Creating Web Applications using ArcGIS Experience Builder
 - Editing architectural drawings in AutoCAD
 - Georeferencing AutoCAD drawings
-

PERSONAL SKILLS

Adaptability

- Worked in remote locations with limited communication.
- Traveled to various locations to inventory community assets.

Emotional Intelligence

- Cognitive of surroundings and the impacts of actions on others.

Written Communication

- Was developing written documentation on GIS workflows.
- Additional writing courses taken during post-secondary program.

Analytic Thinking

- Very detailed when it comes to perceiving a task from a multitude of angles.

Patience

- Ability to walk through technological processes with beginner users and make sure they feel comfortable while learning.

Customer Service

- Taking customer requests related to their GIS needs.
- Provided a kind and welcoming user experience while delivering products as a driver.

WORK HISTORY

Nuu-chah-nulth Tribal Council, Port Alberni (BC) — *GIS Technician 2*

SEPT 2024 - JUL 2025

Field data collection (using Field Maps) and data processing within an enterprise ESRI GIS environment to maintain a utility assets management program for fourteen First Nation communities along the West Coast.

The City of Red Deer, Red Deer (AB) — *Ecological Technician 1, Parks Labourer*

MAY 2012 - MAR 2022

Municipal invasive plants inspector, assisting with the City's community garden plot program. Communicated with business, municipal, and provincial government representatives to communicate and collaborate on legislative requirements.

QUALIFICATIONS

British Columbia Institute of Technology, Burnaby (BC) — *BTech in Geographic Information Systems*

SEP 2022 - APR 2024

Worked collaboratively on a [project](#) sponsored by ESRI Canada to create a BCIT Indoors geodatabase. Created supplemental online applications to display BCIT data to enhance current asset and booking management systems.

University of Alberta, Edmonton (AB) — *B.S. in Environmental and Conservation Sciences*

SEP 2011 - APR 2014

Various courses related to plant identification, rangeland management, and scientific disciplines of the surrounding environment (soil science, ecology). The final [project](#) subject matter centred on the development of a conservation strategy for an endangered species of minnow.
