

JESSE STREIGHT

Port Alberni, BC | (403) 304-0925 | jstreight.com | jesse.streight@outlook.com

GIS Technician | Field Data Collection | Infrastructure Asset Management

Professional Summary

Detail-oriented GIS graduate with hands-on experience supporting infrastructure asset management and field data collection projects. Skilled in geospatial data collection, map production, and customer service within municipal and First Nation contexts. Known for adaptability, and problem-solving. Enthusiastic about applying GIS to improve asset inventories and assist with municipal management.

Technical Skills

- **GIS & Mapping:** ArcGIS Pro, QGIS, Field Maps
- **Web & Data:** ArcGIS Experience Builder, HTML, CSS, Python
- **Database & Asset Management:** Enterprise Geodatabases, QA/QC, Data Integration
- **Field & Equipment:** GPS/GNSS Data Collection, Field Coordination
- **Other:** AutoCAD, Microsoft 365, Technical Writing

Professional Experience

Nuu-chah-nulth Tribal Council — GIS Technician II

Port Alberni, BC | Sept 2024 – Jul 2025

- Managed and updated GIS utility asset databases for 14 First Nation communities, improving spatial accuracy and reliability for infrastructure planning.
- Supported field crews using ArcGIS Field Maps to capture infrastructure data and verify existing assets.
- Collaborated with the engineering manager on asset management forms.
- Conducted data QA/QC and began the development of workflow documentation to enhance reporting efficiency.

The City of Red Deer — Ecological Technician I

Red Deer, AB | May 2020 – Mar 2022

- Conducted field inspections of municipal lands and environmental assets; coordinated invasive plant management and ecological surveys.
- Produced GIS maps and spatial data visualizations to support ecological inventory.

- Liaised with internal departments and external agencies to ensure compliance with environmental regulations.

The City of Red Deer — Parks Labourer

Red Deer, AB | May 2012 – Mar 2020

- Supported urban forestry programs, including pest monitoring, planting, and maintenance.
- Operated heavy equipment during both seasons to support diverse needs.

Education

British Columbia Institute of Technology (BCIT) — *B.Tech in Geographic Information Systems*

Burnaby, BC | Sept 2022 – Apr 2024

- Course topics included geospatial analysis, photogrammetry, imagery analysis and Python programming.

Selected GIS Project

BCIT Indoors Geodatabase – Designed and implemented an ArcGIS Indoors model integrating floor plans, facility data, and web-based visualization tools to optimize space use and asset tracking.
